## This month's meeting is a "Working Meeting"

Meeting started at 7:15. 8 members in attendance. John Wilks talked about his RV-8 project. Taking the "quick-built" approach. Has been working at this for about 2 years now. But in there was a relocation or two. Project is in a nice trailer, which will anytime now go into the Chapter hanger.

Fred had his power parachute DVD. Again Fred has some interesting and enjoyable visuals for us.

From there we went into discussion surrounding the Chapter. Talked about goals, projects and our future. Covered things like updating our by-laws, chapter membership list, etc. Mike has lots of good ideas and plenty of energy. Oh, to be young again.

We ended up by looking at what needs to be done for preparation for this year's AirAffair. Things such as how many airplane kits we will need for "make and take".

Before we adjourned we did agreed to meet that week and look at the roof of the hanger.

Hanger roof will need to be, 1 patched or two replaced. We are looking at cost and man-power. John was going to see about the blue roof material used as temporary cover, but we would cover it with tar. We will also need to look at a little leveling and water diverting. We have lots of good ideas and we think anyone would work. It is just we need to get some more prices.

This month will be the AirAffair planning meeting. We will at all the numbers, staffing, and dollars.

We will also talk about who is going to Air Venture and when.

Mike should also tell us about his new plane!!!!!!!!!!

Here are some good links and things of interest.

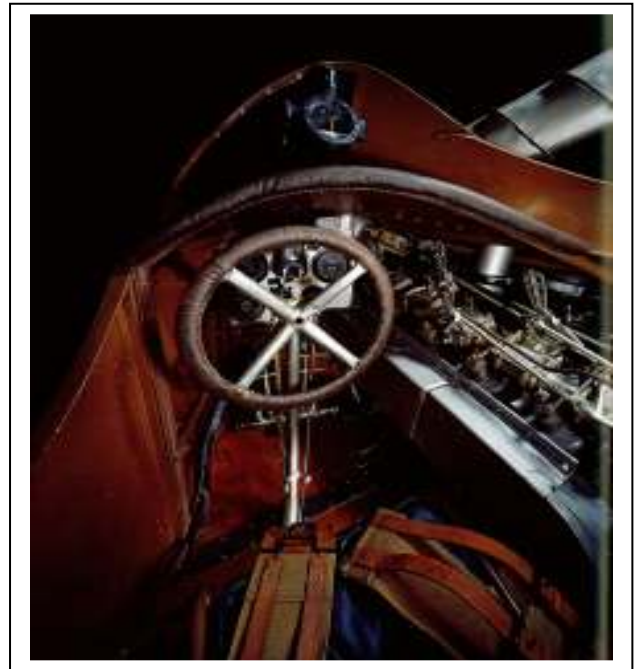

New book at the library is "Inside the cockpit". This is a picture book for the flyer, and an easy read.

I sent out an email with the electric model airplane. If you didn't get it let me know.
